BERNA KURT

PROFESSIONAL PROFILE

Multilingual and adaptable tech professional with hands-on experience in web development, AI training, and cross-cultural collaboration. Proficient in **Python** and **JavaScript**, with practical knowledge of modern frameworks such as **React**, **Next.js**, and tools like **Selenium**, **Supabase**, and **Postman**. Demonstrated ability to combine programming with creative problem-solving, supported by a strong foundation in **UI/UX**, data analysis, and automation. Internationally experienced, including an academic exchange in South Korea, fluent in **Turkish**, **English**, and **Korean**, with a passion for building solutions that bridge technology and global communication.

PROFESSIONAL SKILLS

Technical Skills

Programming Languages: Python, JavaScript

Libraries and Frameworks: React.JS, Next.JS, Framer Motion, Selenium, BeautifulSoup4, Pandas, jQuery, Canvas API

Developer Tools: Supabase, Postman, Git/Github

OS: Windows, Kali Linux

Skills

Software/Programs: Figma, Canva, Adobe Premiere Pro

Other: Translation, Editing & Writing, Communication

Languages: Turkish (Native), English (Fluent, IELTS Academic 7.5), Korean (Fluent), Japanese (Basic)

EXPERIENCE

Outlier AI — *AI Trainer (Freelance)*

NOV 2024 - PRESENT, Remote

- Contributed to the development of AI models by training and refining output in both **Turkish** and **English**.
- Reviewed, edited, and improved AI-generated content for linguistic accuracy and clarity.
- Applied programming skills to support tasks involving data structuring, analysis, and tooling where needed.

Egeline Information Security Inc. — *Web Development Intern*

AUG 2024 - NOV 2024, Türkiye

- Created an interactive SVG-based chart utilizing complex mathematical calculations to dynamically represent data with **JavaScript**.
- Implemented automated **web scraping** and **data entry** processes using **Selenium** and **Python**, optimizing data collection from multiple sources.
- Applied **SEO** best practices, leading to a measurable increase in website performance and improvement in search engine rankings.

BKurt Medical Aesthetic Clinic — *Translator, Interpreter*

FEB 2024 - SEP 2024, Türkiye

- I provided real-time interpretation services between patients and medical staff.
- I assisted non-native Turkish-speaking patients in understanding medical procedures, treatments, and post-care instructions. I also designed some graphics for the clinic's Instagram page.

Facto Foreign Trade and Tourism Investments Inc. — *Customer Support Specialist*

AUG 2023 - FEB 2024, Türkiye

- I provided financial and investment support services, effectively addressing customer inquiries and issues in Korean and English.
- I assisted clients with information on financial products, investment options, and account management.

Private English Tutor — *English Language Instructor (Freelance)*

2020 - 2023, Türkiye

- Delivered personalized English lessons to middle and high school students.
- Focused on grammar, speaking, and comprehension tailored to each student's level and goals.

SBS Korea — *Transcriptionist & Translator (Freelance)*

2023, Türkiye

- Transcribed and translated Korean and Turkish video content for SBS following the February 6 Turkey Earthquake.
- Ensured linguistic accuracy and cultural sensitivity in all materials produced.

EDUCATION

Anadolu University, AS — *Computer Programming*

SEP 2024 - PRESENT, Türkiye

- **Relevant coursework:** Web development, UI/UX Design, Databases, Computer Networks

Ankara University, BS — *Korean Language and Literature*

SEP 2019 - JUN 2023, Türkiye

- Participated in various language exchange programs, Korean movie club, volunteered teaching Turkish to foreign students.

Hanguk University of Foreign Studies — *Exchange Student*

AUG 2022 - DEC 2022, South Korea

- With focus on KFL, linguistics and literature.

Adnan Menderes University, BS — *Computer Engineering*

SEP 2016 - JULY 2019, Türkiye (Incomplete)

- Engaged in competitive gaming by organizing and participating in e-sports tournaments, enhancing teamwork and strategic thinking skills.
- **Relevant coursework:** Statistics with R, Discrete Mathematics, Computer Networks and Security, Web Development

CERTIFICATIONS

İGEME — *Health Tourism Marketing & Promotion Management (Training)*

2023

TÖMER — *Health Tourism English Proficiency Certificate*

2023

SVO — *Medical Translation Certificate*

2023

Acunmedya Academy — *Advanced Front-End Development*

NOV 2024 - APRIL 2025

- Front-End Development with **React.JS**, **Supabase** and **Next.JS**.

BTK Academy — *Cybersecurity*

SEP 2024 - JAN 2025

Completed the following certifications:

- **Introduction to Cybersecurity** *(Siber Güvenliğe Giriş)* – 06.10.2024

- **Introduction to Information Security** *(Bilgi Güvenliğine Giriş)* – 14.10.2024

- **Incident Response** *(Siber Olaylara Müdahale)* – 23.10.2024

- **Introduction to Firewalls** *(Güvenlik Duvarına Giriş)* – 25.10.2024

- **Web Application Security & Penetration Testing** *(Web Uygulama Güvenliği ve Sızma Testi)* – 31.12.2024

- **Cyber Threat Intelligence & Threat Hunting** *(Siber Tehdit İstihbaratı ve Tehdit Avcılığı)* – 31.12.2024

University of Michigan — *Web Development*

2017

Foundations of **HTML, CSS, JavaScript** and **Responsive design**.

Completed the following certifications:

- **Introduction to HTML5** – 2017

- **Introduction to CSS3** – 2017

- **Advanced Styling with Responsive Design** – 2017

- **Interactivity with JavaScript** – 2017

PROJECTS

Link Sharing App

Source Code: https://github.com/beekurt98/link-sharing-app

Live Link: https://linkly.bernakurt.com/

Technologies: React.js, Supabase

A modern Next.js web application for managing and sharing personalized profile links.

- Implements user authentication, profile management, and dynamic link editing using Supabase as a backend.
- Features responsive UI with drag-and-drop link ordering, real-time previews, and custom modal dialogs.
- Utilizes server actions, client/server context, and modular React components for scalable, maintainable code.

Mobile Restaurant App

Source Code: https://github.com/beekurt98/restaurant-order-app

Live Link: https://restaurant-order-app-six.vercel.app/

Technologies: React.js, Supabase

Developed a feature-rich mobile restaurant application with full authentication and CRUD operations.

- Implemented login, signup, and logout using Supabase Auth.
- Users can browse products, manage a shopping cart, and place/view orders.
- Full profile management including address add/edit/delete.
- Mobile-first responsive design.

Terminal Portfolio

Source Code: https://github.com/beekurt98/terminal-portfolio

Live Link: https://terminal-portfolio-brown.vercel.app/

Medium Article:
https://medium.com/@beekurt/the-process-of-building-a-terminal-themed-portfolio-with-vanilla-javascript-926157618f84

Technologies: Vanilla JavaScript

A creative command-line-style portfolio simulating a terminal interface.

- Interactive terminal-like experience for viewing portfolio items.
- Fully developed in vanilla JavaScript.
- Engaging and unique way to showcase projects and skills.

RPG Game

Source Code: https://github.com/beekurt98/trivia-game-rpg

Live Link: https://trivia-game-rpg.vercel.app/

Technologies: Vanilla JavaScript, HTML Canvas

A beginner RPG browser game featuring sprite-based animations and basic gameplay.

- Designed game logic from scratch using vanilla JavaScript.
- Used canvas for animation and interaction.
- Implemented character movement and collision detection.

Dictionary

Source Code: https://github.com/beekurt98/markdown-react

Live Link: https://markdown-react-ten.vercel.app/

Technologies: React, Dictionary API

A responsive dictionary web application for word lookup and definitions.

- Built with React and integrated with a public dictionary API for real-time data fetching.
- Features include word definitions, phonetics, and example usage.
- Clean UI with loading states and error handling for a seamless user experience.

EPUB Web Scraper

Source Code: https://github.com/beekurt98/epub-creation

Medium Article:
https://medium.com/@beekurt/how-to-build-clean-epubs-with-python-using-pypub3-and-beautifulsoup4-d71db394f206

Technologies: Selenium, BeautifulSoup, Python EPUB libraries

Automated tool to scrape web pages and compile content into EPUB files.

- Extracted data using Selenium with custom scraping logic.
- Parsed and cleaned content using BeautifulSoup.
- Generated EPUB files programmatically from structured data.

Markdown Editor

Source Code: https://github.com/beekurt98/markdown-react

Live Link: https://markdown-react-ten.vercel.app/

Technologies: React, Markdown Library

A real-time markdown editor with preview functionality.

- Built with React and integrated markdown parsing library.
- Provided live preview and syntax highlighting.
- Simple and intuitive interface for content creation.

TRAININGS AND EVENTS

Fortinet Security Day 2024 — *Cybersecurity Conference, Participant*

31 OCT 2024, ISTANBUL

- Gained insights into cybersecurity trends, threat intelligence, and network security strategies from leading experts.
